The USA law SHOULD be equal for everybody in the USA.  
Nobody is excluded from that privelege.  
If the USA starts "wheeling and dealing" than the government will create  
a precedent for ever.  
Only competion will thrive the free market, and innovate computing in  
this  
particular case.

ps

Imagine the USA with  
Only Ford,only General Elecric, only Standard Oil,  
This means NO competion.  
NO competion is the downfall of the society.
